Here's how the "smarter" take care card works:

1. Take your over-the-counter healthcare products, prescriptions, and other items to the register and the clerk will ring them up.
2. Swipe your take care card for payment (be sure to swipe your take care card first).
3. The eligible amounts will be deducted from your Flexible Spending Account. The clerk will then ask for another form of payment for the non-FSA-eligible items.
4. If your take care card is declined, the clerk will ask for another form of payment for the total amount.
5. The receipt will identify your FSA-eligible items and provide a subtotal of the FSA-eligible purchases and the sales tax paid.

\*Please save all receipts for items purchased with your flex benefits card. This is an IRS requirement.
